

2017 ARHS Seed Exchange

Sharon Bryson ... Seed Exchange Chair

Welcome to the 2017 Seed Exchange for the Atlantic Rhododendron & Horticultural Society.

The electronic approach to the Seed Exchange seems to work very well. The seed list and order form will go out to all those with email addresses. A hard copy will be made available to those without email.

Once again we will post the Seed List on the Internet which will have a full complement of links to many images and information to help in your decision-making. The online version will have periodic updates on seed lot availability.

Visit The [Willow Garden](#) website and follow the links for 2017 ARHS Seed Exchange. A link to the list will be inserted on the [Atlantic Rhodo](#) site.

We again wish to thank the faithful contributors who have made this possible. The overall success of our Seed Exchange depends upon seed contributions by our members, so please make a “mental note” to save some interesting seeds for next years’ Exchange. There is always an interest in the Companion Plant section as well as the Azalea and Rhododendron sections. Success also depends upon members purchasing seed. Many interesting plants can be added to our gardens by simply growing a few seeds.

Plant enthusiasts outside of our regional society have again made valuable contributions to our annual exchange. Crosses from Y. Doi from Japan are especially noteworthy. Quantities of most are quite small, so order early if you are interested in these lots.

Our 2017 list has several seed lots from the 2016 list. These include both [native species](#) and hybrid varieties; open and hand pollinated. The viability of azalea and rhododendron seed is usually very good, so offering year old seed shouldn’t be a problem for growers. It is always a shame to see “leftover seed” not being used in some useful way.

The offering of hand pollinated Rhododendron hybrids is again quite extensive. The hybridizers have chosen interesting parents in their quest for great foliage, increased hardiness and wonderful blooms. There are several re-offerings in this category, as well.

We have tried to give several seed lots their prerequisite cool treatment. A reminder that most moist packed seed cannot be sent until temperatures moderate towards spring. We have maintained last years’ charge for “shipping and handling” (\$3.00). The rate changes at Canada Post have made the “break even” point quite close.

The deadline for submitting for members-only orders is **Feb 28, 2017**.

Please remember that the seeds go out on a “first-come, first-served” basis dependent on seed quantity. Get your orders in early and you have a very good chance of getting everything on your list. It is VERY helpful to list second choices on the order form. If none are listed, we have to make a small “editorial decision”!

We are again anxious to encourage people to try growing Rhododendrons and Azaleas from seed. Online information is available at both the Atlantic Rhodo and the Willow Garden websites.

To this purpose we are offering a **FREE** package of seed to anyone interested, whether or not you order any other seeds. This is noted in the seed list. Please send the order form and \$3 to cover postage in the usual way. If you need further planting instructions, please ask.

The Seed Exchange will be open to “the world at large” after our Feb.28 member’s-only deadline, and will end April 30, 2017. Feel free to share the list with other gardeners who might not be members of the ARHS. Local garden clubs might find the offerings of interest. We have had orders from many places in the world in the last few years. Stories of your past successes and/or failures with seed growing are most interesting and welcome.

Comments or suggestions regarding the Seed Exchange are also encouraged. You can send a note with your order or email willowgarden_ns@hotmail.com

- a glimpse of some seed parents -

ARHS 2017 SEED EXCHANGE

INSTRUCTIONS

Seed packets are \$2.50 CDN each for collected wild, \$2.00 CDN each for hand-pollinated and \$1.50 CDN each for open-pollinated seed. One packet per lot per person. More may be ordered but are subject to availability. **All orders must be on the form provided and should be received by February 28, 2017 for members-only. Exchange will open to the public after that date until April 30, 2017**

Save this seed list for some of the footnote information.

Send all orders to: **Sharon Bryson, #407 Old Maryvale Rd., Maryvale, Nova Scotia B2G 2L1 CANADA**
Please make your cheque or money order payable to 'Atlantic Rhododendron & Horticultural Society'. Add \$3.00 CDN for postage & padded envelope. Please list substitutes as quantities for some lots are small.

US regulations now require an import permit and a phytosanitary certificate. Seeds sent to the US will be shipped without a phytosanitary certificate and at the orderer's risk.

SEED LIST

DONORS: **ADD** - Betty Ann Addison, Minneapolis, MN **BIR** - Jens Birck, Copenhagen, Denmark
BRU - Joe Bruso, Hopkinton, MA **CAR** - Darwin Carr, Truro, NS **CLY** - Bruce Clyburn, New Waterford, NS

(fr. 2016 seed-ex.) - Shrub
- 155 WEA [Nomocharis](#) Spp. & hybrid mix
Similar to lilies, tender - Bulb
- 156 WIL *Paeonia suffruticosa* var *Spontanea*, from [pink](#)
flowering seedling. - Per †11
- 157 WEA *Pieris floribunda* Boulderwood - Shrub
- 158 WEA *Pinus parviflora* 'Aizu' Japanese White Pine
very dwarf form -Tree
- 159 WIL *Pterocarya stenoptera* (Chinese [Wing Nut](#))
Dark, glossy foliage, interesting bark. †11
Insignificant flowers followed by seed
pods resembling "[wing nuts](#)". 60 ft. - Tree
- 160 WIL *Salvia sclarea* (Clary Sage) [violet](#) flowers,
aromatic, attractive foliage. - Biennial
- 161 WEA *Styrax symplocarpus* †11 - Tree
- 162 NOR *Symplocarpus foetidus*, commonly known as
skunk cabbage. A low growing, foul-smelling
plant that grows in wetlands of eastern North
America. (VERY FEW) - Per
- 163 TRA *Tetradium daniellii*, known as the [Bee Bee](#) tree.
white flowers, mid-summer 30-50 Ft. - Tree
- 164 WIL *Wisteria macrostachya* '[Blue Moon](#)' OP
Lilac blooms in July. Blooms young
- Vine

FOOTNOTES

- †1. 'Right Mighty Splendid' from Captain Dick
Steele 1970's, Bpt 81-RS3 (*R. fortunei* x
R. catawbiense), scented
- †2. ('Barbara Hall' x *R. sutchuenense*) Cross from J.
Weagle 1998, early flowers, large leaf.
- †3. ('Connecticut Yankee' x *R. calophytum*) Cross
from B. Clyburn 2000, early flowers, large
leaf.
- †4. Joe Gable's selections of the reddest flowered
forms of the two native rhododendrons, *R.*
catawbiense and *R. maximum* crossed.
- †5. ('Great Eastern' x Steele Bpt 92-M) Cross from B.
Clyburn, 2002, scented

- †6. ('Janet Blair' x 'Dexter's Honeydew') Cross from B. Clyburn 2004, scented.
- †7. 'Kittatinny' = 'Golden Star' x *R. vernicosum* aff. Rock 18139
- †8. *R. maximum* in all cases is a red seedling of Mt. Mitchell form, aka "Red Picotee" (Bruso crosses)
- †9. 'R. O. Delp' = 'Lodestar' x 'Mary Belle'
- †10. (V-6609 x 'Fiery Orange') is a Jack Looye cross, yellow rhododendron
- †11. Seed has been stratified. Store in fridge in plastic packet as received until March/April then sow in warm soil.
- †12. *Lilium* seeds may require a warm/ moist period followed by a cold period if there is no germination. Plant cold treated pots outside in spring.
- †13. Magnolia seed has been stratified. Store in fridge in plastic packet as received until March/April then sow in warm soil.
Seed will not be shipped until post-freezing temperatures

NOTES

1. Open-pollinated species, with the exception of a very few, may not come true from seed. Cultivars, with the exception of a few perennials do not come true. Plants from these seeds should be labelled as being "ex" that species or cultivar.
2. The 2017 Seed List will be posted on the Internet with insertion of images and links to help in your decision-making. Updates re availability will be posted here. <http://www.willowgarden.net>
Follow the links for 2017 ARHS Seed Exchange. A link to the list will be inserted on the Atlantic Rhodo site. www.atlanticrhodo.org
3. Also see the ARHS website for an article on growing rhododendrons from seed.
4. When sowing rhododendrons on peat we recommend you sterilize it first. Microwave it for 15 minutes or pour boiling water through it several times. Allow to cool.
5. We would like to thank the seed donors for their time and effort making crosses, collecting and cleaning seeds.
