NOTES

- Open-pollinated species, with some exceptions, may not come true from seed. Cultivars, except for a few perennials, do not come true. Plants from these seeds should be labelled as being “ex” that species or cultivar.
- The 2025 Seed List will be posted at www.atlanticrhodo.org
- See the ARHS website for an article on growing rhododendrons from [seed](#).
- When sowing rhododendrons on peat we recommend you sterilize it first. Microwave it for 15 minutes or pour boiling water through it several times. Allow it to cool.
- We would like to thank the seed donors for their time and effort making crosses, collecting and cleaning seeds.
